

INDIA FIRST LEADERSHIP TALK (SHRI ANAND MAHINDRA) IIC, IITDMJ

Event Report

Broadcasting Web link: www.mic.gov.in

YouTube Link: <https://youtu.be/3TGKoErjOBY>

Ministry of Human Resource Development organised India Leadership Talk by **Shri Anand Mahindra, Chairperson, Mahindra Group** on January 8, 2019 at 2pm. The motive of this talk was to help students and teenagers to become successful in life by imparting knowledge about entrepreneurship & innovation. This was a webinar organised by MHRD was an opportunity for college students to learn and explore in the field of business and management. This report entails key learnings & media from the live screening held at IIITDMJ's by its Institution Innovation Cell.

The banner features a portrait of Shri Anand Mahindra on the left. To the right, it displays the event title 'INDIA FIRST LEADERSHIP TALK SERIES' in red, the date and time 'Tuesday, 08 January 2019, 02:00 PM' in white on a dark blue background, and a call to action: 'Send Your Questions for Shri Anand Mahindra on www.mic.gov.in/questions.html before 5th January 2019'. Below this, it provides live streaming links: 'Watch Live on' with Facebook Live at www.facebook.com/mhrds.innovationcell and YouTube at www.mic.gov.in/live.html. Logos for MHRD, MIC, and AICTE are visible at the top right, and the Twitter handle @mhrd_innovation is at the bottom right.

Mr. Mahindra shows thanks the panel for inviting him and talks about a more interactive session where he could communicate and hopes for it as a businessman too. He talks about how he completed his studies from Harvard Business School (HBS) and then he says that he even follows a rule which he calls as HBS. Here, H stands for HUMILITY, B stands for BREVITY ,S stands for SELF AWARENESS. And from this he means one should be humble to everyone irrespective of anything and one should be brief and simple.

When the interviewer asked Mr. Mahindra about failures and problems related to students and has he faced them, he said that failures and problems are a part of life that everyone has to face. He shares his mantra to get out of it and bring the best out of him in such situations. He simply follows two steps i.e. he allows himself to feel bad as it will help him to recover and to make a comeback. The second step he follows to allow himself to feel bad and even low as at such

moments he takes a break and uses this time for healing & absorption. This

prepares him to do something of greater impact.

The next question raised by the interviewer about the problems that a teenager finds and how to deal with it. He says that it is natural that a high school student finds school a terror. He says that when he got admitted in Harvard he got a C grade for his first essay despite the fact that he was a star in his school earlier. His event made him to think about his survival in such an institution where he is not the smartest. This event made him learn that one needs to keep improving himself and allow to explore and grow.

Next he was asked about his own role-models, for which says that his parents always helped him in his life. He said that he was a rebellious child and though his father was thrilled to know that he was interested in business, he still went into filmmaking. His mother always said to him that one should never rely on one idol or role model as everyone has some flaws. One should deconstruct his ego and extract the best qualities to follow to gain more in life. He says that a good leader should have many followers and he/she should be know for his ideas which should be desirable and beneficial in future terms. An ideal leader should never take the whole credit, instead he should share it with followers and colleagues as it increases belongingness towards the business. He then talks about new phases in the market where autonomy, innovation and

entrepreneurship is more encouraged.

He advises youngsters that to do the work that they find pleasure. One should understand his/her needs and should not compare themselves with others since everyone is of a different kind. For business and entrepreneurship one should judge the risk factors and if he/she finds themselves to be capable enough to tackle them then they should get committed to it.

The interviewer asks him about stress management and how to manage work and life efficiently. Mr. Mahindra says that the person who manages work and personal life efficiently is the person who loves his/her work. Such people are more satisfied in life than others. He talks about the change in office

atmospheres as they are now more flexible and recreational for employees and hence the output is better than earlier.

On being asked for future business models he says that nothing waits to be exposed. He thinks that the society never helps the one who has merit or has skills. Everyone has to come out of this society to create something large, one should be collaborative and a fast learner as no one is spoon-fed and everyone is ready for the competition.

He says that about 99 percent people don't want to work under a transactional leader as he/she may not have a vision. Instead people want to work under a transformable leader which means again self awareness is important and hence it helps in being successful. It never matters how big your firm, start up or

group is - the thing that matters is whether you're ready to learn or not.

On his interest in film making he says that his rebellious mind cooled down after his movie was a success which proved to others that he is capable of doing things and then he got interested in business and used his passion to gain success.

At the end he thanked MHRD, MHRD Innovation Cell (MIC) and jury members to call him for the talk and to share his experience with others.
