ABOUT TRACK

Reliability of software based systems depends heavily on fault-free software. Performance of a system is closely associated with software reliability. Right from the analysis and design stage to the maintenance of software based systems, reliability remains one of the major concerns. Therefore, factors affecting software reliability and their early assessment have been important areas of research in software based system development.

An exclusive track on ***Software Reliability*** is being organized during the 1st INTERNATIONAL and 4th NATIONAL CONFERENCE ON RELIABILITY AND SAFETY ENGINEERING (INCRS-2018). This track provides an international forum for presentation of recent developments/innovations on various aspects related to software quality and reliability. Scientists and researchers working in the broad areas of Software and System Reliability are invited to exchange their ideas/results on relevant areas.

Scope of the track on ***Software Reliability*** includes, but is not limited to the following:

- Reliability Specifications
- Reliability Metrics
- Hardware Software Co-Design
- Software Maintainability
- Software Modifiability
- Software Testability
- Software Stability
- Software Safety
- Dependability and dependable systems
- Fault Avoidance and Prediction
- Reliability Engineering

IMPORTANT DEADLINES

Abstract submission:	November 10, 2017
Abstract acceptance notification:	November 10, 2017
Full paper submission:	November 30, 2017
Paper acceptance:	December 20, 2017
Early Registration	November 15, 2017
Registration	January 15, 2018
Final paper submission (Camera ready copy)	January 04, 2018
INCRS ' 2018:	February 26-28, 2018
